- 1 - Introduction   -

After making a codebreaker faq for FE6, I decided to make one for FE8 - the
North American version. This is the exact template from the last one, so I
might accidently leave random bits in. Tell me about them, if you come across
them.

Please note that I'm only an newbie code maker, so I can't make everything.

               ****
                   W A R N I N G
               ****
I am not responsible for any damage done while you are using these codes. By
using these, you are taking the risk and freely admit that you are responsible
your actions. Although the codes _SHOULD_ work, there is a chance that I have
made a typo and I would be happy for you to contact me and notify me about
anything you want corrected.

Keep in mind that this is only for the English Version. Look somewhere else for
the Japanese version, for those who have it - I recommend the FESS forums.

-   2 - Version History   -
----
v1.3 - 09/10/05
Thanks to YougnLink, who pointed out that I forgot to put the
turn status digits in...So I added them in.

He also wanted me to distinguish between the 3 levels of trainees...
So I added them in too

v1.2 - 26/07/05
Ages since an update. Added the level select code, finally added bracketed
helpers for those you are confused with the item digits

v1.1 - 29/05/05 - 30/05/05

Found some enabler codes.
Added Matthew's enalber code. Didn't change version number though.

v1.01 - 27/05/05
Corrected the big error in the items section. Damn me. Ice Dragon already told
me about them and I still uploaded the wrong file. Thankyou to all who emailed
me about this.

v1.0 - 16/05/05
Finished typing up the codes.

-    3 - Notices for Codes   -

Most of these codes were made during the battle preparation, though most of
them will work in-battle. Using them in the battle preparation is the safest
way, since if you manage to wreck something, a simple hard reset will cancel
the codes' effects. In-battle, the game saves every change you make.

In some codes, there is a cluster of Xs. These tell you that these are to be
replaced with some hexadecimal digits that are shown in the section 7 of this
document.

In some codes, there is a cluster of #'s. These tell you to replace them with a
hexadecimal number of your choice. The easiest way to do this is to open up the
windows calculator, turn it to scientific, type in the number you want in
decimal, then press the HEX radio button. The screen should show you the digits
you need to input. In these codes, do not forget that most of the things in FE8
have caps. Exceeding these caps will probably glitch up your game.

Person Slots refer to the placement they are in on the battle preparation
screen. The numbers go horizontally like this:

- 1 - 2 -
- 3 - 4 -
- 5 - 6 -

etc. To check these slots in battle, press R on Seth (who will be slot 1 for
the 1st few missions) and press DOWN. The game will now show slot 2. Keep
pressing down to see the others in their orders of slots.

Please remember how codes work. A code will stay active until you turn it off.
So if you make slot two a mage, turn the code off as soon as your finished,
because if the characters change slots the next slot 2 will become a mage if
the code is still active.

Also, to find out which support cheat to use, get in the pre-battle menu and
choose the supports options. The order shown there is the order for these
cheats

-    4 - Enabler Code   -

Big thanks to ArcaneCook on the cmgsccc.com forums. However he did ask for these
to be tested. Someone else reported them to be working ones. If they dont work,
can someone email me so I can take them off here?

```
000005C6 000A
100013E4 0007

000005C6 000A
100CFB1C 0007
```

Apparently, the above freeze the game. Thanks to Matthew for the next one:

```
00006777000A
10001BE00007
```

```

- O t h e r   S l o t s -

To get the 2nd person , add 48 HEX to the address (1st part).
To get the 3rd person , add 96 HEX to the address.

Basically , find out what person slot the character is in, subtract it by 1.
Convert the answer to hexadecimal and multiply by 48 HEX. Then add it to a
code's address and done.

```

-    8 - Credits    -
--------------------
```

Thanks to Ice Dragon and others on the FESS forums:
(http://s7.invisionfree.com/FESS/index.php?act=idx) for the digits and for
correcting a few codes fo me.

Thanks to crazyguy 19992000 for noticing by off addresses

Thanks for the enabler codes, ArcaneCook. A very big thanks to Matthew for
giving and testing the other enabler code

Thanks to YougnLink for emailing me about certain mistakes in the faq and
helping to improve the guide

Also, big thanks to Intelligent Systems and Nintendo for making this game.

I can be contacted at borkey@gmail.com

Since It's a gmail account, spamm isn't that much of a problem, but if you do send an email to me, make sure you have this exact phrase in the subject or it will be thrown into my junk folder:

"FE8 Codebreaker Codes"

Also say what the email deals with, eg - request, correction etc.
